

TOTAL SAFETY

NO CABLES

Thanks to the **CARBON RELAX** yarns, woven directly into the fabric texture, you won't have any uncomfortable and dangerous electrical cables in your **DOLCE BENESSERE**.

NO BURN RISK

Heat spreads safely and does not accumulate. The carbon fibers disposition is capillary, and resistors are arranged in parallel, differently to the usual snake-like cables layout that dangerously concentrate the heat in some areas.

NO HARMFUL ELECTROMAGNETIC WAVES

Our innovative technology prevents the formation of dangerous electromagnetic fields and that won't generate harmful magnetic waves.

SAFE EVEN IF ACCIDENTALLY WET

You read right, there is no electrocution and electric shock risk with **DOLCE BENESSERE**.

SAFETY EXTRA-LOW VOLTAGE

The device has an extra low voltage, 5 Volt only.

It is fitted with an automatic STOP DEVICE that turns it off after 110 minutes of use. Also, there's an automatic shut-off device, in case of malfunction.

The traditional technology with various thicknesses of electrical cables arranged in a serpentine pattern makes product rigid, bulky in terms of volume and difficult to use. The presence of electrical cables creates uncomfortable protuberances: the body tries to adapt to reduce the compression of intervertebral disc and muscles, and this causes dangerous pressure points and discomfort, fatigue sensation and backache.

FORGET THESE PROBLEMS WITH DOLCE BENESSERE !

It has an ergonomic and attractive design that means a complete adherence to the body (every part will be in a natural position, reaching the optimal warmth, comfort and a relaxing well-being experience). You will enjoy its softness and flexibility.

We didn't develop just a product, but an experience: that's why you will also love the quality of our materials, **100% MADE IN ITALY**.

Because we believe in innovation, we also care about the old century tradition: in our production we maintain tailor made quality from our local textile craftsmen, to offer you the best.

We just want the best for you: **DOLCE BENESSERE** is machine washable at 40°C and has **ANTI-STATIC**, **ANTI-BACTERIAL** and **ANTI-MITE** properties.

ERGONOMY

NO MORE ACHE

LIGHT, FLEXIBLE AND SOFT

MADE IN ITALY

The high-tech carbon nanotube yarn is **ECO SUSTAINABLE: ECOLOGICAL AND 100% RECYCLABLE**.

DOLCE BENESSERE is **ENERGY SAVING** and it has greater electric conversion efficiency, that means an enhanced thermal power.

The carbon fiber heats up much quicker than other conductors (its resistivity is 2,058 times more than the copper one) with **LOWER CONSUMPTION** (35% less than technologies currently in use) since it requires less energy to reach the same temperature.

It does not produce dangerous **ELECTROMAGNETIC FIELDS** typical of Alternating Current powered products with a high voltage.

The innovative **CARBON RELAX TECHNOLOGY** makes it possible to generate heat that is good both for humans and for the surrounding environment.

This is possible thanks to the **EXTRA LOW DIRECT CURRENT VOLTAGE**: it complies with all safety devices as per international standards, and it also protects against the risk of electric shocks caused by water or external impacts.

We're proud to say that we care of combining **HUMAN WELL-BEING** with respect to the **ENVIRONMENT** where we live in!

ELECTROMAGNETIC WAVES**

SAFETY EXTRA-LOW VOLTAGE

WITH THE INNOVATIVE, PATENTED

carbon relax

TECHNOLOGY

YOU WILL DISCOVER A DIFFERENT KIND OF HEAT: FORGET THE IDEA OF THE USUAL HEATING PADS !

When you'll put your hand on **DOLCE BENESSERE** while it is heating up, don't expect an immediate strong warmth, which is no good for your health.

Indeed, **DOLCE BENESSERE** was especially created to give to your body an **UNIFORM**, and **CONSTANT** heat that **PROGRESSIVELY** penetrates in your body thanks to the high-tech nanotube yarns capillary woven directly into the fabric texture.

This means that you're muscle will **RELAX** and you'll feel **REINVIGORATING**, embracing to this special warmth experience.

To obtain the best from your appliance make sure that it is flat and tight to the body. Turn it up at maximum power level and after 10/15 minutes wear it to benefit from the progressive heat spread that will warm your body.

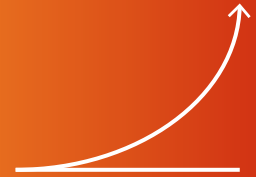

HOMOGENEOUS HEAT

The capillary layout of the high-tech carbon nanotube yarns in the fabric, guarantees an uniform coverage of the surface to be heated. Therefore the transmission and dissipation of heat is homogeneous and provide a sensation of relaxation that helps muscular distension.

NO HOT-SPOTS

No "Hot-Spots" are generated, that can cause burns and overheating in certain parts of the body as occurs with the serpentine arrangement of electrical cables in traditional heat-generating products.

**PROGRESSIVE
REINVIGORATING WARMTH**

**RELAXING
HEALTHY WARMTH**

**EMBRACING
CONSTANT WARMTH**
